

Please read the Net Capacity guidance (DfES/0739/2001) before filling in this form for the first time. This form can be used to assess any primary, middle deemed primary or first and middle school. It is easiest to use the computer spreadsheet, available at www.dfes.gov.uk (search for 'netcapacity'). Use this page to identify the basic information required. List all spaces in the Net Area Schedule on page 2 (following the notes on the facing page). All boxes shaded in grey will be worked out automatically in the computer spreadsheet. The 'Declaration of Accuracy' should be signed by the Head Teacher and a representative of the Local Education Authority.

Capacity Calculation

Basic Resource
Workplaces Workplaces

Workplaces Not Included in Capacity Calculation (if measured)

parents/community room	26	0	workplaces in space marked 'P' at step 4, only one per school
early years and childcare facilities	56	14	workplaces in spaces marked 'E' at step 4, as described under School Details
specialised resourced facilities	0	0	workplaces in spaces marked 'R' at step 4, as described under School Details
adult learning facilities	0	0	workplaces in spaces marked 'A' at step 4, as described under School Details

All calculations below should be **rounded down** to the nearest whole number.

Workplaces Included in Capacity Calculation 350 p 124 q

totals of all workplaces except those shown above as excluded or marked 'W' at step 4

capacity based on classbases	250	r	basic workplaces in spaces marked 'C' at step 4, or $((p + q) \times 70\%)$, if lower
basic workplace allowance	125	s	$(75 \times I)$, plus 50 if (m) is less than $(1500 + (15 \times r))$
maximum workplaces available	250	v	(r), or $((p - s) \times 70\%)$, if higher
minimum workplaces available	210	w	lower of $(v \times 90\%)$ and v rounded down to nearest multiple of $(30 \times n / 4)$
capacity based on planned admission no.	196	x	$(b \times n)$

Net Capacity 210 y

if x is more than v, then $y = v$
if x is between v and w, then $y = x$
if x is less than w, then $y = w$

first admission year

indicated admission number 30 z (y / n) rounded down (n, c, e, f and h as calculated under School Details)

(second admission year, if applicable) (third admission year, if applicable)

$(z \times e) / c$ $(z \times h) / f$
