

IT Services Web Site Services

IT Services can provide your school with a high quality professionally produced web site. This will meet industry standards and present your school in the best possible way on the Internet.

- ✓ The **School website Creation service** provides access to the Web team that developed the Wirral Learning Grid.
- ✓ Web developers will discuss your requirements and guide you through collating information required for your site.
- ✓ Standard or customised options are available as required to produce your site.
- ✓ The **Website Maintenance and Support service** continues the development and update of content beyond the initial creation of your site.
- ✓ These services are designed to **free up valuable teaching or other school staff** resources from the time consuming programming and digital image handling required in producing professional websites.

Web services

The Web team will discuss any requirements in detail, with the aim of creating a site that will raise the profile of a school or service.

IT Services can develop a web site to include many advanced features, Choose from a range of styles such as Brochure, Child Oriented or a combination. Unlimited web pages can be available, each page equivalent to A4 page size, Newsletter Upload Page, Unlimited digital images, Planned structure and impact of your website,

We will arrange submission of the website to major and topic specific search engines.

Quotations will be provided for creation and ongoing website content updates.
